Axel Cuello - Questions in English

1) **What are your strengths?**

   I believe that my main strength is the ability to work as a team because I believe that one can help and receive help for a common project and this is great in computing. I also consider that I can learn things faster than normal.

2) **What are your weaknesses?**

   I think my main weakness is usually to talk to people because I am a very shy person and it is very difficult for me to meet new people. I am currently improving this defect day by day.

3) **What are your goal in this career?**

   My objective in this course is to acquire knowledge about web technologies such as HTML, CSS, JavasCript and some "framework" used, because I really like to know about this and in the labor market this skill is much in demand.

4) **Where do you see yourself in five years?**

   I really do not know, maybe in five years I have a degree in computer science, as a network technician or maybe I'll close to being an engineer. I sincerely like many things like music and administration. I could say that I'm trying to know what I'm going to do.

5) **What do yo look for in a workplace?**

   In a workplace I look for an environment that is like my second home, since I will spend a third of my life working. I would like to find teammates that in addition to working together, we could share things of Friends

6) **Do you think you work well in a team?**

   Of course, I really like working as a team. I will try to be the best companion trying to help and be helped, because together we can go far.

7) **What role do you usually assume in a team?**

   Usually my role is to be an member more in projects that I have had as in the utu. I usually give ideas along with that of my colleagues and try to create the best way to achieve the goal and please everyone. In general I like the low profile
